

CEL-FI™ GO G41

powertec

3G/4G/5G

Smart Signal Repeater

The Cel-Fi GO G41 Smart Signal Repeater is designed to solve cellular coverage problems for voice and data. With support for 5G NR operation in traditional LTE bands, the system supports seamless migration to 5G NR. At up to 100 dB of gain, it is the most powerful carrier grade solution available. The Cel-Fi GO G41 covers up to 3,000 square meters of indoor space per system. Configure with included donor and server antennas, or expand options with outdoor or multiple server antennas. The Nextivity commitment is to protect the operator's network, deliver the best cellular performance, and be the easiest solution to install.

Cel-Fi GO G41

Benefits:

- Improves cellular coverage
- Simple management through WAVE system
- Deploy the unit anywhere in the network, with full frequency coverage
- Up to 3,000 m² coverage area
- Support for Dynamic Spectrum Sharing (DSS)

Use **Cel-Fi WAVE** mobile application to aim an external antenna and ensure an optimal donor signal.

Download on the **App Store** GET IT ON **Google play**

System Features

- Smart Signal Repeater
- Multiple Installation options supported.
- LED User Indicators for Status
- Simple, built-in, self-test
- SMA-Female RF Connectors for Donor and Server, for flexible deployment
- Support for Cel-Fi WAVE mobile application suite, as well as Cel-Fi COMPASS
- Ethernet port for easy connectivity to WAVE Portal for professional installers
- Convection cooling

Wireless Features

- Carrier Grade, Smart Signal Repeater
- 3G/4G/5G NR
- Up to 100 dB gain
- Multiple RF Front End configurations available
- Total system relay bandwidth: Up to 40 MHz
- Relays two (2) bands simultaneously (up to 20 MHz each)
- Supports multiple channels per band in bands 1, 3 and 7
- Advanced digital echo cancellation

Mobile Network & Network Protection Features

- Automatic configuration of all system parameters
- Provider-specific system: Cel-Fi distributes and boosts service only for the Operator PLMN-IDs for which the device is authorized and configured
- Secure and ciphered provisioning
- System intelligence accurately establishes proper safe uplink power in real time
- Uplink Muting Mode automatically shuts down uplink cellular transmissions when no active user equipment is detected
- Supports Dynamic Spectrum Sharing (DSS)
- Nextivity purpose-built, high-performance, six core ASIC processor, provides best performance at lowest cost

Wireless Benefits

- Distribute and boost cellular coverage
- 5G, 4G and 3G support, Voice and Data, network safe
- LED cues provide visual feedback for ease of setup and status
- Works with any User Equipment (UE) from the designated Operator
- Supports in-band and guard-band NB-IoT deployments

System Benefits

- Clear and reliable cellular connections within coverage area up to 30,000 ft² (3,000 m²) per system
- Highest gain (100 dB) provides best coverage footprint
- Advanced Echo-Cancellation allows Cel-Fi to transmit more power with lower antenna isolation requirements giving the largest coverage footprint.
- Linearity eliminates IMD desense issues
- Dynamic gain control ensures maximum gain – best coverage – at all times in ever changing RF environments, without user intervention

Mobile Network Benefits

- Flexibly deploy on LTE, DSS, 5G, VoLTE, LTE-Advanced, NB-IoT and WCDMA networks
- Automatically adjusts channel bandwidths
- UE control is transparent and remains centralized in the network core (no gateways or third-party software)

Compliance (check individual product regional compliance)	3GPP TS 25.143 Rel.13 3GPP TS 36.143 Rel.13 Bluetooth BQB CE ACMA (Australia) (G41-JE/G41-NE/G41-QE) R-NZ (New Zealand) (G41-JE/G41-N)
